Art Unit: 3724

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 15 and 18-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Dufner '991, who shows a cutter with all of the recited limitations including a series of zig-zag arranged plates. Each straight section constitutes a single plate with an approximately rectangular cross-section and diagonal cutting edge that is axially symmetrical. In particular, look at the top row of cutting edges in figure 4. Dufner's cutter is *capable* of cutting belts.

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection. Applicant has overcome the rejections under 35 USC 112. Made of record but not relied on are patents to Elasser and Brunson showing diagonally traversing cutting edges.
